

Place patient label here:

The reagents to be tested are as follows (please check the box of the reagents to be tested):

	Reagent	Result (mm)		Reagent	Result (mm)
<input type="checkbox"/>	Histamine		Grasses		
<input type="checkbox"/>	Negative Control		<input type="checkbox"/>	Rye	
Mites and Insects			<input type="checkbox"/>	Bermuda	
<input type="checkbox"/>	D Pteronyssinus		<input type="checkbox"/>	Bahia	
<input type="checkbox"/>	D Farinae		<input type="checkbox"/>	Johnson	
<input type="checkbox"/>	Cockroach		Others		
Pollens			<input type="checkbox"/>	Mosquito	
<input type="checkbox"/>	Ragweed Mix		<input type="checkbox"/>	Latex	
<input type="checkbox"/>	Acacia		Referring Doctor: Date: Tested By: Scientist Comments:		
<input type="checkbox"/>	Privet				
Moulds					
<input type="checkbox"/>	Alternaria				
<input type="checkbox"/>	Aspergillus Fumigatis				
Dander					
<input type="checkbox"/>	Cat				
<input type="checkbox"/>	Dog				
<input type="checkbox"/>	Feather Mix (chicken,duck,goose)				
<input type="checkbox"/>	Guinea Pig				
<input type="checkbox"/>	Horse				
<input type="checkbox"/>	Rabbit				

Guidelines for the request of Skin Prick Tests:

The Paediatric Respiratory Laboratory provides Skin Prick Testing. The laboratory does not provide management of allergies or prescription of Epipens/Anapens.

Any wheal size ≥ 3 mm more than the negative control is a positive result suggesting the presence of allergen specific IgE. Histamine is a positive control and has to be >3 mm for the test to be valid.

Tests should be based on the patients' history.

Due to mandatory ASCIA guidelines, food allergen testing is not available for primary care. Should this be clinically required then referral to a General Paediatrician or an Allergy Specialist is recommended.

Please contact the Paediatric Allergy or Respiratory Specialist on-call through switch 49213000 if you have any specific questions regarding the interpretation of the test
